Gun 310ml Hte Viscosity CNV100SP26/R1

Gun 310ml Hte Viscosity CNV100SP26/R1

Ref : 0903023

Characteristics :

- **Cartridge**: up to 310 ml
-**Brand** : TAJIMA
-**Type** : Extruder Gun.

Description :

TAJIMA Professional Extruder Gun.
Compatible with cartridges up to 310 ml capacity, it offers massive extrusion power thanks to the pressure reduction (x26), which allows you to work on long jobsites without tiring your hands. This gun is suitable for the use of high viscosity products.
Lightweight and durable due to its 100% aluminum body, its 360° swivel capability will allow you to work in all positions and reach places where space is limited.
The soft, non-slip handle fits perfectly on the palm of your hand. A tip fixed on the side of the gun allows you to unclog the hardened nozzles with glue or dry filler.
