Technical data sheet

KFS window sill

Baustyl PRO range

Description

Decorative element for building facades, lightweight mineral-based building material, various silicates, with a low synthetic resin content.

Scope of application

Product suitable for installation on new buildings or in renovation. Suitable for single-family homes, collective and tertiary housing buildings, Public Receiving Establishments (ERP) and industrial buildings.
This product is compatible with ITE systems.

Advantages

- Very light material
- High weather resistance
- Very easy to use
- Ready to paint

Precautions for use

Finishing paint shades with a solar absorption coefficient greater than 0.070 (luminance of light less than 35%) are to be avoided.

Fire classification	B1 classification	
Mechanical characteristics	Mechanical tests can be carried out at the customer's request	
Dimensions	Length	1200 / 1500 / 1800 / 1800 / 2000 mm
	Depth	410 mm
	Thickness (height)	25 mm
