

# Technical data sheet

## KFA window sill

Baustyl FLEX range

### Description

Decorative element for building facades, lightweight mineral-based building material, various silicates, with a low synthetic resin content.

### Scope of application

Product suitable for installation on new buildings or in renovation. Suitable for single-family homes, collective and tertiary housing buildings, Public Receiving Establishments (ERP) and industrial buildings.

This product is compatible with ITE systems.

### Advantages

- Very light material
- High weather resistance
- Very easy to use
- Ready to paint

### Precautions for use

Finishing paint shades with a solar absorption coefficient greater than 0.070 (luminance of light less than 35%) are to be avoided

Fire classification B1

Mechanical characteristics

Mechanical tests can be carried out at the customer's request
